St. Charles, Missouri 63304

Addressees:

The U.S. Department of Energy at the Weldon Spring Site Remedial Action Project will extend the comment period by 30 days for the review of documents comprising the draft Remedial Investigation/Feasibility Study-Environmental Impact Statement (RI/FS-EIS). The comment period, which will end February 19, 1993, has been extended as a response to requests for more time to review the documents.

We are notifying you today since in our original correspondence to you in November, 1992, we announced that the public comment period would last for 60 days ending January 20, 1993.

Information relevant to the proposed remedial action is located in the administrative record and public reading room at the Weldon Spring Site Remedial Action Project Office. Copies are also available for review at the Spencer Creek Library, the Kathryn Linneman Library, the Kisker Road Library and the Francis Howell High School Library.

Written comments should be sent to the following:

Stephen H. McCracken, Project Manager
ATTN: RI/FS-EIS Comments
